

Scientific Breakthrough Reduces Cell-Phone/PC Effects

These effective biocompatible devices protect against the harmful signals emitted by cellular phones and computer monitors. **Tecno CMO**, an internationally patented technology that **maintains biological equilibrium**, was developed in Europe by internationally renowned scientists. More than 20 specialists in biophysics, immunology, neurology, theoretical physics, ophthalmology and endocrinology have validated the Tecno system during its 9-year development. CE-approved by the European Union.

This technology has been scientifically proven to reduce the electromagnetic stress caused by harmful frequency signals from cellular phones and computers. One recent study done at Columbia University showed that heat-shock proteins (which the body produces in higher quantities following stress or shock) increased after exposure to cell phones, and then decreased when exposed to the phone and the Tecno protection at the same time. Another study conducted in the United Kingdom showed that use of the technology resulted in a 33% to 51% reduction in common symptoms associated with chronic exposure to phone and computer radiation. You can download a summary of research studies on our Website, www.cutcat.com.

HOW THE TECNO CMO PROTECTION WORKS

The Tecno CMO (Compensatory Magnetic Oscillator) contains an electromagnetically charged microcrystalline solution that acts as an oscillator, emitting a weak field that is tuned into the field emitted by the phone, TV or laptop. The oscillator's ultraweak field achieves resonance with the very sensitive receptors of living organisms: At the cellular level, the CMO oscillators maintain the ion/protein relationships that can be disrupted by polluting radiation, protecting the normal electromagnetic functioning of blood, the nervous system, the hormonal immune system and organs such as the brain and eye. The Tecno easily attaches to the phone or monitor with adhesive backing.

Tecno Cell Phone: \$44.95, 2 or more \$39.95 each

Tecno LCD for flat screens (computer monitors, TVs, laptops): \$64.95; 2 or more \$59.95 each
